

Objective

Pharmaceutical sciences combine scientific aspects that are critical in the development and manufacture of new drugs, handling of medicines and medical devices. Pharmacology is the branch of biology concerned with the study of drug action, where a drug can be broadly defined as any man-made, natural, or endogenous molecule which exerts a biochemical or physiological effect on the cell, tissue, organ, or organism. There are many chemicals with pharmacological properties, but need special measures to help them achieve therapeutically relevant amounts at their sites of action. Drug design is the inventive process of finding new medications based on the knowledge of a biological target. More specifically, pharmacology is the study of the interactions that occur between a living organism and chemicals that affect normal or abnormal biochemical function. In the present conference, pharmaceutical experts from various international/national organizations will address the diverse aspects related to pharmaceutical sciences.

About the Association

Association of Pharmacy Professionals (APP) is a unique organization of more than 1500 dedicated professionals willing to serve pharmacy profession in dynamic ways and involves people from various arena including students, teachers, researchers, scientists as well as industry professionals. APP aids in extending the knowledge and facilities of several technical institutes, industries as well as health sectors to the remote areas where the service and live functionality of pharmacy profession is the real want. This humble act might be in the form of academic, research or health related activities. The association also share the responsibilities of professionals towards the community and social liabilities. APP accesses the availability of expertise when it needs and ensures that the systematic teaching learning activities not only occurs but also reach to the common knowledge development system by acting as source of fulfilment. Kindly visit the association website www.appconnect.in for more details.

About the Institute

Vijaya Institute of Pharmaceutical Sciences For Women has been founded by SRK Foundation with an aim of transforming the young girl students of the country to those women contributing to the development of their nation. VIPW is in continuous efforts for realizing its mission to serve the state, nation and the world by delivering exceptional pharmaceutical scientists and stupendous pharmacists who are able to cater to the healthcare needs of diverse populations. The vision of the institution is to achieve the top most position in the field of pharmacy educators through excellence in education. VIPSW has well stocked library with 3400+ books, journals and well-equipped labs with properly trained lab assistants for imparting proper practical knowledge to the students. The infrastructure includes a large number of well-ventilated and spacious classrooms, seminar halls, auditoriums, playgrounds and other basic facilities for personal development of the students including hostel facility. This institution keeps the quality and completeness of its students' education at the top most priority. Kindly visit the institute website <https://vipw.in> for more details.
