

Objective

The pharmaceutical sciences combine a broad range of scientific disciplines that are critical to the discovery and development of new drugs and therapies. Clinical pharmacy is a health science discipline in which pharmacists provide patient care that optimizes medication therapy and promotes health, and disease prevention. In the pharma space, Artificial Intelligence is working with researchers to support the decision-making processes for existing drugs and expanded treatments for other conditions, as well as expediting the clinical trials process by finding the right patients from several data sources. Over the years, pharmaceutical scientists have been instrumental in discovering and developing innovative drugs that save thousands of people's lives and improve the quality of life for many others. Drug development describes the process of developing a new drug that effectively targets a specific weakness in a cell. This process involves specific pre-clinical development and testing, followed by trials in humans to determine the efficacy of the drug. Further, the study of pharmacology encompasses the sources, chemical properties, biological effects and therapeutic uses of drugs. These fast growing areas demand a global platform for discussion of various pharmaceutical aspects and the present conference will provide the same through expert lectures.

About the Association

Association of Pharmacy Professionals (APP) is a unique organization of more than 2000 dedicated professionals willing to serve pharmacy profession in dynamic ways and involves people from various arena including students, teachers, researchers, scientists as well as industry professionals. APP aids in extending the knowledge and facilities of several technical institutes, industries as well as health sectors to the remote areas where the service and live functionality of pharmacy profession is the real want. This humble act might be in the form of academic, research or health related activities. The association also share the responsibilities of professionals towards the community and social liabilities. APP accesses the availability of expertise when it needs and ensures that the systematic teaching learning activities not only occurs but also reach to the common knowledge development system by acting as source of fulfilment. Kindly visit the association website www.appconnect.in for more details.

About the Institute

Narasaraopeta Institute of Pharmaceutical Sciences (NIPS) is committed to impart the quality education with human values to meet the needs of the society with an aim to improve the health management system. Quality education is our committed policy by providing well-equipped infrastructure to enable our students morally, ethically, and technically to become proficient pharmacists. The main vision of the institute is to be a center for excellence in pharma education, research & training for the rural folks and to produce human resources of exceptional leadership quality to serve national needs. The mission of the institute is to maintain discipline and professionalism among the students, to establish global standards of excellence in pharma education, to be socially responsible by conducting health camps to create cognizance among the Public, facilitating Skill enhancement through add-on courses, to conduct certification programs to accouter students with modern trends in the field of Pharmacy and exhilarate youngsters to develop leadership skills globally. We offer B.Pharm, M.Pharm, Pharm.D courses with all necessary approvals from AICTE - New Delhi, PCI - New Delhi. Kindly visit the NIPS website <https://nips.edu.in> for more details.
